 Seat: W 18", D 18", H 19-3/4" to 30-1/4"
 Back: W 17-7/8", H 16"
 COM ydg seat and back: 3/4

Navigator® Task Seating

Comfortable and lightweight, Navigator is the ideal choice for task chair mobility.

Comfort

Navigator's patented mechanism provides extraordinary comfort by gradually increasing resistance over the full 12 degrees of back flex. The contoured waterfall seat, lumbar support and pneumatic seat-height adjustment increase sitting ease for extended lengths of time.

Design

Designed by Giancarlo Piretti, Navigator task chairs are lightweight and small in scale, allowing for quick, easy movement and high seating density. Clean lines and design continuity (with Navigator stack chairs and tandem seating) make them compatible with any setting. They are the ideal solution for learning and collaborative environments.

Simplicity

Easy to use Navigator task chairs keep it simple. Seat height adjusts pneumatically from 16" to 21". The back flex is passively ergonomic (automatically adjusts) and the seat swivels. It couldn't be simpler.
