PREMIUM LAMINATES (UPCHARGE APPLIES TO ALL SURFACE TEXTURES)

SOLIDS WOODGRAIN LAMINATES METALLICS

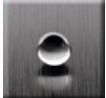

Select Laminate Surface Textures (excluding for MARKERBOARD WHITE)

LAMINATE SURFACE TEXTURES

#01 HIGH GLOSS - PREMIUM

A mirror sheen finish, which gives a smooth, brilliant appearance. Recommended for horizontal applications such as countertops and light-to medium commercial applications. Excellent for vertical application.

#18 LINEARITY - PREMIUM

A directional texture running the length of the sheet, having a narrow, random, matte-gloss linear quality. It is complementary to linear woodgrains, and linear patterns and provides dimension and visual movement to solid colors. Recommended for horizontal and vertical application.

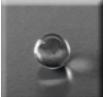

#35 MIRAGE - HD PREMIUM

Subtle variations in matte and gloss finish connect to nature's own finishes: rough and weathered, smooth and polished. Recommended for horizontal and vertical application.

#57 ALIGNED OAK* - HD PREMIUM

NEW Authentic realism is brought to the surface using synchronized texture as each elegantly aged oak design exhibits the natural dimension and feel of real wood. Recommended for horizontal and vertical application.

#07 TEXTURED GLOSS - PREMIUM

A textured finish which reproduces the high sheen of waxed wood furniture. Recommended for horizontal and vertical application.

#19 LENO WEAVE* - PREMIUM

NEW Random intersecting horizontal and vertical lines create a geometric weave with a matte-gloss mix. Recommended for horizontal and vertical application.

#38 FINE VELVET TEXTURE -STANDARD

A smooth textured finish with moderate reflective value. Recommended for horizontal and vertical application.

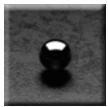

#60 MATTE - STANDARD

Textured finish with a moderate reflective quality. Recommended for horizontal and vertical application.

#12 SOFTGRAIN - PREMIUM

A dense, woodgrain structure that is low gloss and soft to the touch. Subtle highlights of reflectivity randomly occur within the embossed grains, creating a sophisticated raw wood look. Recommended for horizontal and vertical application.

#22 ANTIQUE - PREMIUM

A mixture of varying low gloss features combined with organic movement, indicative of the surface of an aged stone or an antique metal. Recommended for horizontal and vertical application.

#52 QUARRY - PREMIUM

Premium finish emulating the "pitted" look of polished natural stone. Recommended for horizontal and vertical application.

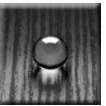

#78 FINEGRAIN - PREMIUM

This premium finish features the polish and luxe of a real wood veneer, with a subtle, narrow grain structure that runs the length of the sheet. Recommended for horizontal and vertical application.

#16 CASUAL RUSTIC - PREMIUM

A woodgrain texture with a blend of grain variations ranging from linear to subtle movement with random, irregular features. The overall low gloss surface is accented with random highlights. Recommended for horizontal and vertical application.

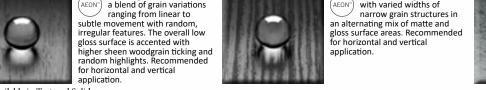

#28 GLOSS LINE - PREMIUM

A linear woodgrain texture with varied widths of narrow grain structures in

#55 GLAZE - HD PREMIUM

A layering of matte AFON" features over a glaze of semi-gloss, creates this timeworn effect. Recommended for horizontal and vertical application.

Finish features AEON™ Enhanced Performance Technology, providing 3x industry standard wear resistance, improved AEON' scratch, scuff and mar performance, versus comparable competitive finishes.

ANTIMICROBIAL PROTECTION is built into the laminate to protect the surface against damaging microbes. Antimicrobial agents protect the surface from the growth of mold and mildew that cause odors when used for countertops and work surfaces.

StyleLinks Benching General Information

The StyleLinks Collection offers well-designed efficiency in space planning, supporting the focused work of an individual, the collaborative process of a group interaction, or the temporary needs of a touch-down space.

StyleLinks Benching is ideal for high density planning. Smaller footprints bring more users into a space and reduce per-user costs, while its simple design supports multiple planning styles. Privacy screens, dividers and optional modesty panels enable users to define personal space and establish a higher degree of privacy while maintaining an open, collaborative environment.

StyleLinks Benching is designed to withstand the rigors of all markets. From its frame to screens, to storage, it is built to last.

StyleLinks Benching offers three distinct planning styles:

- Basic workstations, with 29" nominal finished height, for traditional benching applications in single- and dual-sided planning styles
- Café height (42" nominal finished height) single-sided and teaming tables
- Work rail-based planning that allows for the attachment of supporting privacy screens, shelves, and storage elements

Worksurfaces

StyleLinks Benching can support a variety of worksurface shapes designed for flexible workstation planning. All are available in a wide range of sizes. Worksurfaces shall be 1-1/8" thick high density particle board core with high pressure laminate top and phenolic backing sheet. Tops to be predrilled to accept bases and standard components. Total dimension is 1-1/4" thick. When attached to frames, worksurfaces will "float" above the frame.

Dual-sided applications feature two worksurfaces. When no screen is specified, worksurfaces abut one another. Optional Framed Privacy Screens are inserted between worksurfaces and are attached to the legs. Frameless Privacy Screens and Supporting Privacy Screens utilize a center work rail that separates the worksurfaces. Overhang of worksurface will vary by configuration and screen use.

Worksurface options for 29" finished height applications include:

- Rectilinear
- Peninsula
- Extended Corner
- Return
- Adjoining
- Conference End

Rectilinear worksurfaces for 29" finished height dual-sided applications may be specified with an optional sliding feature. Rectilinear worksurfaces for 29" finished height dual-sided applications may be specified with an optional sliding feature.

Worksurface options for 42" finished height applications include single-sided rectilinear tops and teaming rectilinear tops. Sliding worksurfaces are not available on 42" units.

Frames for 29" Finished Assemblies

Single- & dual-sided support frames provide structural support for the worksurfaces. They are available in single-sided (24" & 30" depths), and dual-

sided (48" & 60" depths) applications. Frames are specified as "starter" or "adder," depending upon their placement in a row. Single Sided frames support fixed worksurfaces only, while dual-sided frames support either fixed or sliding worksurfaces. All StyleLinks support beams are telescopic to allow for support of multiple worksurface widths. Telescopic range varies by frame size; consult price list for details. Base support profile is 1-1/2" x 2-3/8", and a gap of 1-5/8" will be present between base structure and worksurface when assembled.

Starter models contain a set of end frames along with the necessary worksurface brackets and beam(s). These units are used as standalone by themselves or in conjunction with adder models to create rows of workstations. Adder models contain a single Intermediate frame support and the necessary worksurface brackets and beam(s) to be used along with a starter model number to create rows. A typical row would contain (1) starter model and any number of adder models.

Perpendicular Support Frames are a group of parts that provide structural support for worksurfaces that are configured perpendicular to the main frame supported beams. Frames are available for support of single worksurface depths of 24" and 30" or for support of dual worksurface depths of 48" and 60". Perpendicular support frames can also be ordered as needed for reconfigurations.

Frames for 42" Café Height Finished Assemblies

Frames for 42"H assemblies are offered in 24" and 30" worksurface depths on single sided rows, and in 42" and 48" worksurface depths for teaming tables. Frames are specified as "starter" or "adder," depending upon their placement in a row. Starter legs for 42" H assemblies are inset from the edge of the worksurface, and adder legs span two worksurfaces. Frames include integral modesty panels which are all specified separately. Consult the Planning Guide are attached to the legs for support. Modesty panels extend beyond the legs to the table edge.

Note: Fixed worksurfaces only should be specified for 42"H assemblies.

Above Worksurface Framed Screens and Dividers

Framed Screens and Dividers are constructed with an aluminum frame that provides superior strength and can be powder coated in frame matching or accent colors. The standard top rail provides a single slot that may be used to hang accessories; alternately an optional tool rail containing three slots may be specified. Insert material options include acrylic, acrylic markerboard, and tackable fabric.

Framed Screens and Dividers are offered in heights of 13" and 19" for all insert materials and in a 31" height with fabric only inserts. Single, uninterrupted screens are available in 6" increments from 24" to 78". 60", 64", 72" and 84" screens are offered with center segmentation, and 90" and 96" units are available in two or three equal segments. Privacy Screens are located flush with the bottom of the worksurfaces, run parallel with the support beam, and do not require the use of a work rail. On single-sided applications, mounting brackets are attached directly to the bottom of the worksurfaces. On dual-sided applications, mounting brackets are attached to the support frames.

Divider Screens rest on top of the worksurface and run perpendicular to Privacy Screens. When used with a Privacy Screen, the Divider attaches to one end and is supported by a sliding or fixed worksurface attachment bracket on the other end. Divider screens may also be specified without Privacy Screens.

Modesty Panels

All modesty panels are 10" tall and constructed of 14 gauge steel with 1/4" diameter holes on 3/4" centers. They are available in standard powder coat colors and are supported by brackets that attach to the underside of a worksurface.

Modesty panels for use on single-sided frames for 29" high assemblies are located flush to and inset of the frame legs. These modesty panels do not attach to the legs and are not required for structural integrity.

Modesty panels for use on single-sided or teaming table frames for 42" high assemblies are attached to the legs and span the entire width of the worksurface with a 1/4" reveal.

One modesty panel is included and required for structural integrity on single-sided applications and two modesty panels are included and required for teaming table applications.

Electrical Components

The prewired electrical is a 10-Wire 6 Circuit/6-2-2 system(UL183): (6) hot wires, (2) shared oversized neutral wires, (2) ground wires {(1) isolated ground, and (1) building ground}. The 6-2-2 system allows more workstations to feed from one power supply point. Each wireway is designed to accept one duplex receptacle per side on each end, for a total of four. Table-to-table electrical is accomplished by jumpers. The system is energized by either a Base Infeed (liquid tight covered flexible conduit) or a Top Infeed (metal flexible conduit housed by an extruded aluminum pole). Hardwire electrical is also offered.

For ease of specification, some rectilinear and teaming worksurface models include preconfigured electrical harnesses. Peninsula worksurfaces, returns, and all assemblies that feature a "center work rail" do not include any electrical components. Supporting privacy screens or frameless privacy screens require the use of specific electrical components for attachment below the center work rail. Infeeds, receptacles, cable risers and jumpers for rules and specific models as they relate to Electrical Planning.

LED Double Arm Task Light with freestanding Base

- Includes light and base
- 7 watts, 18 fractional LEDs
- · Automatic shut-off after 10 hours
- 50,000 hour life
- · Aluminum and plastic construction
- · Touch and hold dimming
- Base is 6.5" in diameter and 1-1/4" high
- Light paddle is approximately 5 x 4"
- Horizontal arm extends 15" with paddle from vertical arm
- 6 foot cord

LED Double Arm Task Light, Tool Rail Mount

- · Includes light and tool rail mount
- 7 watts, 18 fractional LEDs
- Automatic shut-off after 10 hours
- 50,000 hour life
- Aluminum and plastic construction
- · Touch and hold dimming
- Mounting clip measures 3.5 x 3.5"
- · Horizontal arm extends 15" with paddle from vertical arm
- 6 foot core

1 Select Basic Model.

2 Select Color.

### **Frameless Privacy Screens**

Frameless Privacy Screens feature the option of either acrylic or glass inserts fitted into an aluminum work rail whose top rests flush with the top of the worksurface. Screens are offered in 13" and 19" heights and in widths of 6" increments from 36-96" (64" is also available).

Frameless Privacy Screens are offered on dual-sided benching assemblies only. Corresponding worksurfaces must be specified as non-powered, and must utilize "Rail Supported" electrical components.

Note: Dividers cannot be attached to Frameless Privacy Screens.

### **Supporting Privacy Screens**

Supporting privacy screens feature an aluminum work rail whose top rests flush with the top of the worksurface. Vertical aluminum posts and a single top rail enclose insert panels offered in steel dry erase markerboard, acrylic, or tackable fabric options. Screens are 19" high and are available in widths of 6" increments from 36-96" (64" is also available). Supporting Privacy Screens require the attachment of a Laminate Counter Shelf or Upmount Storage Cubby, specified separately, to complete the assembly.

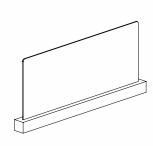

Supporting Privacy Screens are offered on dual-sided benching assemblies only. Corresponding worksurfaces must be specified as non-powered, and must utilize "Rail Supported" electrical components. Dividers may be attached to Supporting Privacy Screens at intersection locations.

### **Shelves and Upmount Storage Cubbies**

Designed to complete a Supporting Privacy Screen assembly, Laminate Counter Shelves and Upmount Storage Cubbies expand storage options within Benching applications. Shelves are 15-3/4" deep, and overhang each side by approximately 7". Widths range from 36-96" in 6" increments. Upmount Storage Cubbies are split (open on the right hand side) to provide each of two facing users equal storage space. Open laminate with steel partition or steel with sliding/locking doors are available in 6" increments from 36-72".

# Frameless Center Privacy Screen with

### **GENERAL INFORMATION**

The StyleLinks Storage offering is a collection of elements created for space efficiency within open environments. The collection consists of shared lockers and individual Credenzas and Pedestals.

### **CONSTRUCTION AND STANDARD FEATURES**

### **Shared Lockers**

Standard size and large lockers are sized to accommodate binders, bags and other personal items. A coat hook is standard and an optional fixed blank shelf (which divides the compartment vertically in two) is available for the large lockers. Large lockers are double the height of standard lockers. Both the standard and large locker shells are available in 30" & 36" widths. The standard locker is available in 3 heights: 33-1/8", 48-7/16" & 63-3/4" and large locker is available in 2 heights: 33-1/8" & 63-3/4".

### Interior Clearance:

Single Module: 13-1/2 & 16-1/2W x 16-7/8D x 14-1/2H Double Module: 13-1/2 & 16-1/2W x 16-7/8D x 30-1/8H

### Shell:

StyleLinks locker shells are formed of 18 gauge, uprights, top and bottom reinforcements welded together to create a rigid box frame. The outer skin is constructed of 19 and 20 gauge CRS with a seamless back detail. Lockers feature leveling glides with a 1" adjustment range. Shell is common to the 700 Series lateral storage units.

### Partitions:

A 1-1/2" thick double wall hidden partition divides the locker shell in half running from top to bottom into which the cupboard doors lock.

### Shelves:

1" thick shelves with front and back flanges screw into the upright members of the case and center partition to create separation between modules.

### Doors:

Locker doors are single-wall construction with a structural hinge channel running the length of the door. Self-closing European style hinges with 110 degree opening provide 3 way adjustment of door to ensure consisting gapping and operation.

### **Locker Locks**

There are four locking options for StyleLinks lockers:

### Standard key lock

Requires key for operation
Best suited for dedicated user who will not lose the key

### Pad lock

Pad lock must be supplied by user Best suited for extended use by either temporary or dedicated users

### **Combination lock**

Requires no physical implement to lock or unlock Best suited for dedicated use Each user sets unique code for use

### Digital lock

Requires battery to operate (battery lasts approximately 4 years)

Requires no physical implement to lock or unlock

Well suited for regular turnover of lockers throughout day

Each user sets unique code for use

Master override key required to reset dead batteries; lock remains locked when battery is dead

### Credenzas:

StyleLinks credenza shells are constructed of 18 and 20 gauge steel components with 18 gauge structural top and bottom reinforcements and vertical uprights. Credenzas are available in 60" & 72" widths and feature variations of open bookcase and drawer sections. Credenzas are available in heights of 17-11/16", 20-3/4" and 23-13/16".

### **Interior Configuration & Clearance:**

17-11/16" high unit:

Bookcase section - 12-3/8" H x 28-1/2" & 34-1/5" W x 18" D

Drawer Section – A) 12" Drawer with 27 & 33 lineal inches of filing side to side. Unit standard with side to side folder bars, optional plate dividers (sold separately).

B) Qty, 2 6" box drawers that will accept plate dividers (sold separately).

20-3/4" high unit:

Bookcase section - 15-7/16" H x 28-1/2" & 34-1/5" W x 18"D Drawer Section - 3" Pencil Drawer & 12" Drawer with 27 & 33 lineal inches of filing side to side. Unit standard with side to side folder bars, optional plate dividers (sold separately).

23-13/16" high unit:

Bookcase section - 18-1/2" H x 28-1/2" & 34-1/5" W x 18"D with 1 adjustable blank shelf Drawer Section - 6" Drawer that will accept plate dividers (sold separately), 12" Drawer with 27 & 33 lineal inches of filing side to side. Unit standard with side to side folder bars, optional plate dividers (sold separately).

### Drawers

Steel and laminate drawer fronts that accept exterior pulls are available as standard. Fronts are screw-mounted to roll-out shelves to build drawers. All drawers feature smooth riding, full-extension, ball bearing slides. Pull options include ADA-compliant nickel plated loop pulls or nickel-plated rectangular pulls. Key lock is standard on 12" drawers.

### Testing

Components have been tested to accept loads of 125 pounds, exceeding ANSI/BIFM X5.9 2004 standards for filing when recommended counterbalance weight is installed.

### Partition:

A 1-1/2" thick double wall partition runs down the center of the unit dividing the bookcase section from the file section.

### Legs:

1-1/2" x 3/4" Steel legs with threaded insert and 16 ga top plate are bolted to the underside of the credenza raising it 3-1/16 off the floor. Adjustable leveling glides provide 1" of adjustment.

### Pedestals:

Mobile Box/File Pedestals 15 W x 21-3/4" are available in 3 depths, 17-5/8", 21-

5/8" and 27-5/8".

### Basic Shell:

Twenty gauge steel body with 20 gauge steel top and box frame front and back uprights. Uprights are notched in 3" intervals for drawer suspension mounting.

### Drawers:

Single wall metal or laminate fronts screw mount to pre-painted drawer bodies and overlap the face of the unit. Box (6") Drawers operate on 2 piece 3/4 extensions ball bearing suspensions, File Drawers operate on 3 piece full extension ball bearing suspensions. Pull options include ADA-compliant nickel plated loop pulls or nickel-plated rectangular pulls.

Approx.

Acrylic Grid Pattern
Printed Surface

**Acrylic Solid White Unprinted Surface** 

Acrylic Translucent Crystal Unprinted Surface

StyleLinks Screens, as part of the StyleLinks Collection, offer freestanding mobile collaboration and space division. Mobile screens feature steel frames and acrylic inserts, either printed or unprinted, with dry-erase coating. All StyleLinks Screen models meet or exceed relevant ANSI/BIFMA X5.6-2010/ BIFMA 5.9-2012 standards, available upon request.

## **CONSTRUCTION AND STANDARD FEATURES**

### **Frame Construction**

Mobile frames are constructed of steel tube supports. Tubes are shaped and joined to create a screen with interior storage compartments. Frame is fully coated with dry-erase powdercoat paint, allowing marker write-ability on all painted surfaces. Frames support the attachment of acrylic sheets for the creation of a two-sided complete screen, and frame design allows for physical connection of one screen to another. Frames feature 2 steel formed hooks for attachment of flip chart pads. Screens available in heights of 72" and 80", and in widths of 36" and 42". Screen floor space depth is 22-1/2".

### Acrylic Inserts

One-quarter inch thick acrylic sheets are captured on either side of steel frame. Acrylic features dry-erase coating on user-facing side of each sheet for full surface write-ability. Inserts may be specified in either unprinted or printed styles. See images above and price list for available options. Other print patterns and customization are available through KI Custom Options, subject to additional lead time and set up charges.

### Steel Inserts

Steel inserts feature a dry erase-writable surface attached to a hardboard core. Steel inserts are magnetic and accept optional tackable fabric bulletin boards and rails.

### **Fabric Inserts**

Fabric inserts feature fiberglass cores. Inserts are tackable and are offered in a variety of colors. Fabric inserts are neither write-able nor magnetic.

### Casters

Casters feature 4" black swivel twin wheels, and are plate-mounted.

### Ledge

An optional steel accessory shelf ledge is available allowing for placement of foam board or other presentation materials at the bottom of the unit.

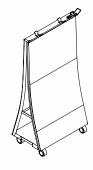

### **Bulletin Boards and Rails**

Optional tack-able bulletin boards are intended for placement on the upper portion of steel insert tiles. Boards are magnetically attached and are fully repositionable.

Rails are intended for horizontal placement anywhere on a steel insert.
