## Develop® L-Base Table

Models EL, EC, 3EL & FX

### TECHNICAL SPECIFICATIONS

#### Develop L Base Dual & Triple Motor Electric-Base (Model EL, EC & 3EL)

##### General

The Model EL table consists of two adjustable height T-bases (centered column on a horizontal foot). The Model ELC table consists of two adjustable height C-Bases (off centered column on a horizontal foot). Bases attach to a tabletop support that spans the two bases. The Model 3EL table consists of three adjustable height C-Bases (off centered column on a horizontal foot). Bases attach to the tabletop support that spans the three bases. All tabletops adjust between 26" and 52" from the floor by means of electric controls that can be located at either end of the table.

##### Base

The base consists of a column assembly and foot both finished with baked-on 30-sheen powder-coat paint. The column assembly consists of an outer member, an intermediate member and an inner member. The outer member consists of a  $2\frac{3}{8}$ " x  $4\frac{3}{8}$ " rectangular 14-gauge steel tubing with a  $\frac{1}{4}$ " steel plate welded on the top end. The intermediate member consists of a 2" x 4" rectangular 14-gauge steel tubing. The inner member consists of a  $1\frac{1}{2}$ " x  $3\frac{1}{2}$ " rectangular 14-gauge steel tubing with a  $\frac{1}{4}$ " steel plate welded on the bottom end. A 6-gauge formed steel motor housing is welded to each outer leg member for strength. The foot consists of an extruded aluminum component with a nylon toe cap inserted into each end. The foot is attached to the column with four 6 mm bolts. Two  $1\frac{1}{2}$ " diameter nylon base leveling glides are threaded into the foot.

##### Tabletop Support

The tabletop support consists of a 14-gauge 1" x 1" steel tubing attached to each leg column with 6 mm bolts. An 11-gauge U-shaped cross member connects each leg assembly for stability.

##### Control Box

The control box comes standard with an integrated two button controller. Tables also ship standard with a more compact corded two-button remote control switch. This allows two switch options for every customer. All table controllers come standard with programmable container/shelf stop, and ISP (Intelligent System Protection). The stand-by power consumption is 0.3 watts.

##### Wire Trough

The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides six access holes to feed wires or install cable management systems.

### Toggle Fixed-Base (Model FX)

#### General

The table consists of two T-bases (centered column on a horizontal foot) supporting a tabletop. The top of the tabletop is 29" from the floor. See page 10 for top sizes.

#### Base

The base consists of a top plate, column and foot all finished with baked-on 30-sheen powder-coat paint. The top plate is 6-gauge thick steel. The column consists of a  $2\frac{3}{8}$ " x  $4\frac{3}{8}$ " rectangular 14-gauge steel tubing with a  $\frac{1}{4}$ " thick steel plate welded on the bottom and top end. The top plate is attached to the column with four 6 mm bolts. The foot consists of an extruded aluminum component with a nylon toe cap inserted into each end. The foot is attached to the column with four 6 mm bolts. Two  $1\frac{1}{2}$ " diameter nylon base leveling glides are threaded into the foot.

#### Wire Trough

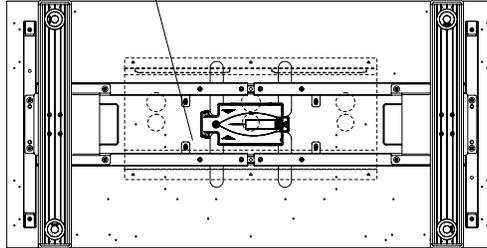

The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations.

### Wire Trough Placement on Dual Motor Electric-Base Tables (Model EL & EC)

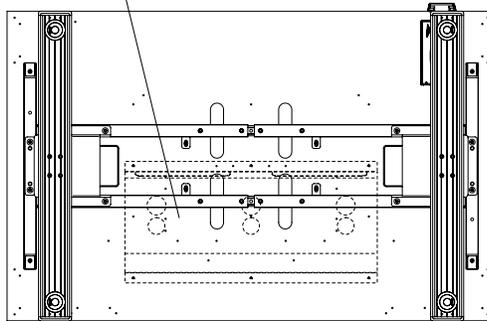

For Dual Motor Electric-Base Tables, an optional wire trough can be mounted directly over the cross support tubes. For 36" deep rectangular tables and 120-degree tables, the optional wire trough may also be mounted behind the cross support tubes if desired.

**Wire Trough Placement on Fixed-Base Tables (Model FX)**

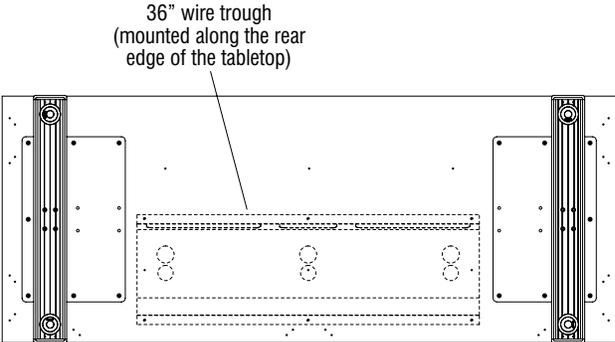

For 60" and 72" wide Fixed-Base Tables, an optional wire trough can be mounted centered or along the rear edge of the tabletop. The optional wire troughs are not available for 48" wide rectangular tables due to insufficient clearance between the leg mounting plates.

### Wire Trough Placement on Triple Motor Electric-Base Tables (Model 3EL)

For Triple Motor Electric-Base Tables, an optional wire trough can be mounted directly over the cross support tubes on the left- and right-hand side of the table. Reference the chart below to specify wire troughs for all applicable Triple Motor Electric-Base Table models. The tabletops below will have appropriate pre-drilled holes to accept the wire trough listed.

## Develop® L Base Adjustable Table, Control Unit

### FEATURES

- High efficient switch mode power supply (SMPS).
- Low standby power consumption, low field emission.
- Table height display with up to 3 memory positions (depending on remote control).
- ISP (Intelligent System Protection).
- Container/Shelf Stop Programming.
- Enhanced Drive Comfort.
- Integrated two button switch.

Table Specs	
Base Widths	• 43.31"-70.87"
Foot Options	• 24" & 30"
Height Range	• 26"-51"
Speed	• 1.4 inches per second
Load Capacity	• 200lbs

### NOTE:

- Don't open the control unit or motor housing under any circumstances as there is a danger of electric shock.
- The control unit may only be operated with main voltage as specified on the type plate. Control units are also available for the main voltages used in other countries.
- Only use the power cord supplied with the control unit. Check that it is not damaged and do not ever operate the table control unit if the power cord is damaged.
- The control unit must be mounted before commissioning and operation.
- When installing the control unit and putting it into operation, be sure that the table is acclimatized to the temperature and humidity values for operation, shown on the next page.
- In the event of a fault, please contact customer service immediately. Only original spare parts may be used for repairing the control units. Parts may only be replaced by qualified service technicians, otherwise the warranty/guarantee shall be null and void.
- Do not expose the control unit to moisture, drips or splashes.
- If strange smells or fumes occur, unplug the power cord immediately and contact customer service.

## TECHNICAL DATA (Cont.)

### 3.2 INTELLIGENT SYSTEM PROTECTION (ISP) - ANTI PINCH

- Pay attention to the following instructions if you are using the new anti-pinch feature ISP (= Intelligent System Protection).

**WARNING:** In spite of ISP being in place, there may still be a risk of pinching in exceptional cases, as it is not only the control unit, but also the interaction between the mechanical and electronic systems that is responsible for cutting out the motor. In addition, the mechanical components, motor and ambient conditions all affect cut-out sensitivity. As the table manufacturer, we cannot therefore eliminate this residual risk completely or accept any liability.

### 3.3 TYPE PLATE

- The following figure shows the type label and its location on the control box housing.

**NOTE:** Specifications on the type label are dependent on the version of the SMART-e-SPFE control box.

## END OF LIFE DISPOSAL

- When you no longer require the SMART-e-SPFE control unit, please note the following for disposal:

**NOTE:** The SMART-e-SPFE control unit is electrical or electronic equipment according to directive 2002/96/EC and therefore marked with the symbol depicted on the left.

**NOTE:** Ensure eco-friendly disposal of all the control unit components (separate the plastic and electronic parts for collection). Also ensure eco-friendly disposal of all the other components (drives, cables, etc.).

## STANDARDS

### EUROPE
